SUMMARY

Software Engineer with experience developing full-stack features for financial investment infrastructure. Proficient in TypeScript, Node.js, and React, with a strong background in managing relational databases and shipping code within regulated environments. Committed to resolving production issues and maintaining high system reliability through rigorous technical standards and automated workflows.

EDUCATION

Federal Center for Technological Education Celso Suckow da Fonseca (CEFET/RJ) - Bachelor's Degree in Computer Science
Expected graduation: December 2028

EXPERIENCE

Petros: Petrobras Social Security Foundation

sep/2024 - sep/2026

Full Stack Software Development Intern (Investment Department)

- Developed and maintained internal web applications used by the investment department.
- Implemented new Front-End and Back-End features using Vue.js, JavaScript, TypeScript, and Node.js, with system integration through REST APIs and RabbitMQ.
- Traced data flows and managed relational databases using SQL and PostgreSQL to maintain high-quality records of securities and asset movements.
- Fixed bugs and continuously improved production applications.
- Developed automations for internal processes and documentation.
- Maintained dashboards and Business Intelligence solutions using QlikView.
- Participated in the full development lifecycle utilizing Git, Docker, and Azure DevOps to scale delivery velocity through CI/CD pipelines.

PROJECTS

Brokerage Firm Catalog (Node.js): application for listing active brokerage firms registered with the Brazilian Securities and Exchange Commission (CVM). Information is collected from the Brasil API, active firms are filtered, and the resulting data is saved to a CSV file.

so_long (C / MiniLibX): developed a 2D game with graphical rendering, player movement, collision detection, item collection, and map logic management.

Minitalk (C): developed a client-server application for inter-process communication using UNIX signals, implementing a bit-by-bit message transmission protocol.

Born2beroot (Linux): configured and administered a secure Linux server in a virtual machine, implementing user management, SSH, firewall, LVM, security policies, and system monitoring.

SKILLS

Languages: JavaScript • TypeScript • Python • C.

Front-end: React • Vue • Next.js • HTML5 • Tailwind CSS • Bootstrap • Vite.

Back-end: Node.js • Express.js • PostgreSQL • REST APIs • RabbitMQ • DB Beaver • Insomnia • DashBoard-QlikView

Cloud & DevOps: Docker • AWS • Azure DevOps • Git • Linux • CI/CD.

Interests: Front-End Backend • Cybersecurity • UI/UX • Artificial Intelligence/AI • 3D & Interactive Web Experiences

CERTIFICATIONS AND ADDITIONAL INFORMATION

Design UX Professional Certificate - Google 2026

Cybersecurity Professional Certificate - Google 2026

Front-End Development Track - Santander Coders Program – 2023

Volunteer work experience at a cat shelter, supporting animal care, temporary fostering and social media management since 2023

Available for remote positions
